Degree: B.E - CSE

2024_28_III_OOPS Using Java Lab

2028_REC_OOPS using Java_Week 3_Q2

Attempt : 1
Total Mark : 10
Marks Obtained : 10

Section 1 : Coding

1. Problem Statement

Monica is interested in finding a treasure but the key to opening is to get the sum of the main diagonal elements and secondary diagonal elements.

Write a program to help Monica find the diagonal sum of a square 2D array.

Note: The main diagonal of the array consists of the elements traversing from the top-left corner to the bottom-right corner. The secondary diagonal includes elements from the top-right corner to the bottom-left corner.

Input Format

The first line of input consists of an integer N, representing the number of rows and columns.

The following N lines consist of N space-separated integers, representing the 2D array elements.

Output Format

The first line of output prints "Sum of the main diagonal: " followed by an integer, representing the sum of the main diagonal.

The second line prints "Sum of the secondary diagonal: " followed by an integer, representing the sum of the secondary diagonal.

Refer to the sample output for formatting specifications.

Sample Test Case

Input: 3
1 2 3
4 5 6
7 8 9
Output: Sum of the main diagonal: 15
Sum of the secondary diagonal: 15

Answer

```java
import java.util.Scanner;
import java.util.Arrays;
class Main{
  public static void main(String arg[]){
      Scanner sc=new Scanner(System.in);
      int a=sc.nextInt();
      int summain=0;
      int sumsec=0;
      int [][]arr=new int [a][a];
      for(int i=0;i<a;i++){
        for(int j=0;j<a;j++){
          arr[i][j]=sc.nextInt();
          if(i==j){
             summain+=arr[i][j];
          }
          if(j==(a-1-i)){
             sumsec+=arr[i][j];
          }
```

```
        }
    }
    System.out.println("Sum of the main diagonal: "+summain);
    System.out.println("Sum of the secondary diagonal: "+sumsec);
    }
}
```

Status : Correct   **Marks : 10/10**
